## Kuri-Clamp<sup>™</sup> Heavy Duty Worm Gear Clamp

### WGC-CSHD Series WGC-SSHD Series

**General Applications:** 

- Aircraft
- Industrial

Even Sealing Pressure – Quality controlled to comply with military standards.

**Construction (WGC-CSHD):** Four-piece construction consisting of a 9/16" wide, 300 series stainless steel band; plated carbon steel hex screw with 5/16" head and two-piece, 300 series stainless steel housing.

**Construction (WGC-SSHD):** Four-piece construction consisting of a 9/16" wide, 300 series stainless steel band; stainless steel hex screw with 5/16" head and two-piece, 300 series stainless steel housing.

### Features and Advantages:

- Quadra-Lock Housing Four-piece, quadra-lock housing design: added saddle eliminates risk of seam separation, virtually eliminating housing "lift and twist".
- Evenly Distributed Radial Pressure Quality controlled to military standard specifications for even distribution of sealing pressure. Eliminates leakage caused by uneven housings and provides higher sealing pressure with lower applied torque.
- Arched, Perforated Slots Provides for more overall steel between perforations for added band strength and allows for smoother engagement.
- Heavy Duty Stainless Steel Band 300 Series stainless steel band provides durability and superior corrosion resistance. Wider than standard clamps for greater strength.
- Hex Screw Sharply defined hex angles for better gripping power. More threads per screw results in increased torque strength.
- Meets Industry Standards Clamps are SAE J1508 Type F and RoHS compliant.
- **Torque Rating** Suggested installation torque of 25-37 inch pounds (WGC-CSHD), and 30-45 inch pounds (WGC-SSHD).
