

# PB-20

## Paw Blaster™ System

### FEATURES & BENEFITS

The Prestec PB-20 Paw Blaster™ system is the key component for enhancing both quality and yield for your paw operation.

The stainless steel construction of the Paw Blaster™ has the option for on-floor installation and boasts NEMA 4x rated control components. Its compact design saves vital space on the production floor aiding to streamline your facility design and efficiently maximize performance.

The Paw Blaster™ operates with a direct coupled motor and pump module eliminating the issue of slipped or worn out belts. When used in conjunction with other paw systems, the final product is greatly enhanced and one you can be confident in.

*Model shown above is the PB-20 Single-line System.*
